THE UNITED STATES OF AMERICA CLAIMS A FEDERAL RESERVED WATER RIGHT AS DESCRIBED BELOW

Sources of Water: Williamson River (WM-1)

Tributary to: Upper Klamath Lake

Water is claimed for the following uses for the federal reservation:

The following table provides monthly instream water claims which are necessary to preserve and protect the Klamath Tribes' hunting, fishing, and gathering rights. The instream flow claims are expressed in cfs for three interdependent components of fish habitat, wildlife habitat, and vegetation, each of which is essential to habitat maintenance. The three components are physical habitat (developed using the IFIM process approved in OAR 690-28-027(2)(a)), riparian habitat maintenance, and structural habitat maintenance. For physical habitat and riparian habitat maintenance, the claim is for the natural flow up to the designated monthly value. The instream flow required to satisfy the structural habitat maintenance need is dependent on the natural flow in the stream. Whenever the natural flow exceeds the structural habitat maintenance trigger flow, the structural habitat maintenance claim shall be implemented; the structural habitat maintenance claim shall be for the natural flow between the trigger flow and the designated cap flow. The physical habitat, riparian habitat maintenance, and structural habitat maintenance flows are not additive.
